# DISCOVER HAPPY LEARNING BY NACE SCHOOLS

*A child's first years of life are vital to awaken their passion for learning and to take on a second language on without effort.*

*Day by day children here grow happily, discovering their abilities in a warm and familiar atmosphere with a team of native professionals who adore their job.*

*This is what we call **Happy Learning**.  
Come to meet us and you will understand why our little ones can't wait for it to be Monday.*

## WITH NATIVE TEACHERS

*Children learn English by playing and don't even realize they are using another language*

Through songs, games, arts and crafts, our little ones speak English without effort and develop a positive attitude towards other languages and cultures. From the age of four they start learning Mandarin, which due to its special structure, encourages the child's cognitive development.

# WE DEVELOP CHILDREN'S CREATIVITY

*Every child is a creator, protagonist of his/her own learning*

We encourage and stimulate children's imagination as a treasure which will turn them into unique beings. With all sorts of fun activities such as symbolic play, experimenting, art, music, psychomotricity, our little ones are able to express their ideas and emotions by developing abstract thinking and by using original strategies to solve any difficulty in life. The creative child will always be there, all through life.

# MANAGING EMOTIONS

## *Developing emotional intelligence*

Our little ones learn to recognize their own emotions as well as other people's and to identify them and manage them with total ease. Our educators promote their self esteem, empathy and other social abilities making the child feel loved and valued at all times, encouraging their self control and helping them to face life's challenges.

## MUSICAL STIMULATION

### *Discovering the musician they have in them*

One of the pillars of the educational project of NACE Schools is the integration of music in the curriculum. The children live a wonderful sensorial experience by being introduced from a very early age to rhythm, melody, dance and song, encouraging their emotional, social, cognitive and physical balance. This awakens in them a special feeling for music which they will be able to enhance later being part of the orchestral and choral groups of the **Conservatorio del Liceo**, which is linked to our school.
